About Us

History:

With several generations of business excellence in the region, our Board of Directors created viable and affordable solutions to the growing demands for advanced methods of home construction and development. Established in 2015, this privately owned and family operated company is situated at 140 Calcutta Settlement Road, No. 2 , Freeport.

Vision:

Our Vision is to serve our many stakeholders from private individuals, small businesses, commercial entities, (regional and multinational) and governments with advanced technology an quality products and service unsurpassed.

Objective:

Our objective is to identify and provide Smart Innovative Building Materials that are durable, time-saving and cost effective for all construction projects. We also supply innovative and elegant finishes for both indoor and outdoor.

Benefits of Artificial Grass

Maintenance Friendly :

Unlike Natural Grass, Artificial Grass requires no maintenance to maintain its beautiful green appearance. It saves money and time with no weekly mowing.

Environmentally Friendly :

Since the product requires no maintenance from gas or electric powered lawn equipment, Artificial Grass is Eco-friendly compared to natural grass. A simple sweeping with a broom will clear away most debris from the top of the turf and have it looking great in no time. It is also kid and pet friendly due to no harmful chemicals needed.

Kid & Pet Friendly :

Artificial Grass is Kid & Pet Friendly due to no harmful chemicals needed to protect its health.

Artificial Grass hardly needs maintenance. The installation of an artificial lawn eliminates the need for harmful pesticides, herbicides and fungicides while at the same time requires no mowing, fertilizing, reseeding or watering. It is easy to remove debris .

“ To Build, Renovate and Beautify with Smart Innovation.”

Saves Water :

Unlike natural grass, Artificial grass does not require daily watering . It saves water which helps with the environment and your monthly cost.

Cost Effective :

Most Artificial lawns last 20 years or more before they need to be replaced. From a cost analysis standpoint, that makes a wise financial decision as well. Add up the cost you'll incur keeping a grass lawn alive and healthy over 20 years (including watering, maintenance equipment and fertilizer) and the long term cost benefits of artificial grass starts looking pretty good to just about any homeowner.
